

Dhaivat Jambudia

Forward Deployed AI Engineer · AI System Architect

✉ dhaivatjambudia@gmail.com 📍 India 🌐 dhaivat-jambudia ⚙️ Exergic ✖️ dhaivat00

Experience

Exergic Labs, AI Backend Developer

- Built and deployed scalable RAG applications integrating LLMs with vector databases for enterprise knowledge retrieval.
- Optimized ingestion, embedding, and retrieval pipelines to reduce hallucinations and improve answer accuracy.
- Delivered AI-powered knowledge systems that cut information retrieval time and improved business decision-making.

Remote
Dec 2025 – present
6 months

Freelance, AI Native Backend Engineer

- Built an LLM orchestration workflow router that selects the right model per prompt — covering text LLMs, text-to-image, and speech-to-text / text-to-speech models.
- Designed long-term and short-term memory systems for AI agents — long-term memory retains critical user context (name, age, location) and short-term memory keeps conversation context consistent across turns.
- Integrated full agent stack with Telegram for real client deployments.

Rajkot, India
Apr 2025 – Dec 2025
9 months

Education

Vellore Institute of Technology, Computer Science and Engineering with Big Data Analytics

India
Aug 2023 – July 2025

V.V.P. Engineering College, Rajkot, Mechanical Engineering

Rajkot, India
2017 – 2021

Skills

AI & ML

Backend & Infrastructure

Certificates

Oracle Cloud Infrastructure AI Certified Foundations Associate

Supervised Machine Learning: Regression and Classification

Projects

Late Delivery Prediction at the Time of Order Place

Predicts whether a supply chain order will be delivered late at the moment it is placed, enabling proactive logistics decisions before shipment.

- Built on a real-world supply chain dataset with end-to-end ML pipeline.
- Deployed as a live web application on Vercel.
